Abdalghani Dakkak

FRONT-END DEVELOPER

WORK EXPERIENCE

JUNIOR FRONT-END DEVELOPER
Tad Center | [Homs, Syria]
Jun 2024 - Oct 2024

Projects: Swiftap.

- Worked with many libraries like Stripe for payment and Chart.js for charts and more.

INTERNSHIP FRONT-END DEVELOPER
Akwad | [Homs, Syria]
Nov 2023 - Mar 2024

- I successfully converted four UI designs into fully functional and responsive web pages using HTML, CSS, JavaScript, and Bootstrap.

- Additionally, I implemented two UIs using React and Redux, which allowed me to deepen my understanding of state management and component-based architecture.

- Throughout the internship, I focused on writing cleaner, more maintainable code. I adopted best practices such as modularization, proper commenting, and consistent formatting.

- I developed a website featuring authentication mechanisms. This project involved implementing user registration, login, and secure access to certain features.

- One of my key goals was to improve the dynamic nature of my code. I focused on making the styles adaptable to future modifications, ensuring that changes could be made with minimal effort.

- I created a chat application using React, featuring two distinct themes. To manage the styling for these themes, I utilized "Styled Components," which allowed for seamless theming and easier style management.

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY
Al-Ba'ath University — 2022
